

Manufacturing Process Engineer

Full Time

The ideal candidate for our Process Engineer is someone who can combine strategic decisions with hands-on approach, is excellent at troubleshooting, can think on their feet and is excited about change and new challenges.

Our manufacturing is focused on plastic extrusions, hot air welding and some CNC machining.

The Process Engineer will work on designing new extrusion products, and will have the ability to bring their own product ideas to the table. They will be responsible for ensuring the production process produces high quality products, equipment is properly maintained and the process is efficient and effective. This role will report to the Operations Manager and have a dotted line to the Vice President.

General Responsibilities

- Develop and refine processes to improve the efficiency of our equipment and the quality of our products
- Improve and maintain our PM program
- Introduce and/or implement new products or equipment to our current portfolio
- Setup and run experiments on our current equipment, mainly the single screw plastic extruder
- Troubleshoot and diagnose equipment failures and implement measures to avoid failures
- Design tooling for new extrusion products
- Support the engineering efforts of the company by providing ideas, comments and drawings
- Perform other duties as required

Preferred Qualifications

- BA or BS degree in Engineering (Mechanical, Chemical, Material Science, Manufacturing) preferred
- 3 to 5 years of experience of extrusion process engineering or relevant field
- Knowledge of engineered plastics (PVC) is required
- Ability to handle necessary repairs and maintenance tasks
- Excellent prioritization and project solving and root-cause analysis skills
- Group communication skills with team-oriented focus
- Proficiency in 2D and 3D CAD software with 3D Printing a plus
- Adaptable - adjusts to changing demands, priorities and objectives
